Marquette University — *Milwaukee, WI*
College of Business Dean's List, Ignatius and Magis Scholarship, Member of Beta Gamma Sigma Business Honors Society
GPA: 3.58/4.00

PROJECTS

E- Connect Platform for Anton Technology LLC (Backend Developer) — 2024

Anton Technology is a small consulting firm who helps Chinese suppliers explore the US market, find the suitable original equipment manufacturer (OEM), and build strong business relationships. This application created a comprehensive B2B platform for Anton Technology LLC, designed to facilitate interactions between Chinese suppliers and U.S. OEMs.

- *Engineered a robust product database encompassing over 100 products from various suppliers, enabling OEMs to search by industry and request detailed information with a single click.*
- *Implemented a consulting service request system, streamlining communication between interested OEMs and Anton Technology. Utilized AWS Simple Email Service (SES) to notify intermediaries, improving the consulting process by 50%.*
- *Developed a project coordination module that empowered Anton Technology to initiate and manage projects between suppliers and OEMs, enhancing the efficiency of cross-border business collaborations.*
- *Designed an advanced search engine for supplier and OEM selection, allowing users to search products by multiple criteria, reducing the average time to find suitable suppliers by 30 seconds per search, leading to faster procurement cycles.*
- *Designed Java DTO (Data Transfer Object) mechanism to control the information returned, preventing users from accessing sensitive data such as pricing, thereby avoiding competition issues.*
- *Utilized JSON Web Tokens (JWT) for secure authorization and authentication, ensuring that only verified users could access sensitive features and data, thereby enhancing the platform's security.*
- *Automated the CI/CD pipeline using AWS CloudFormation, enabling seamless deployment by automatically testing and deploying any changes made in GitHub, improving deployment efficiency by 80% and significantly reducing the time from development to production.*

My Portfolio (Frontend Developer) — 2024

- *Developed a responsive portfolio website using HTML, CSS, and JavaScript, showcasing personal projects and professional experience.*
- *Optimized the website for performance and accessibility, ensuring cross-browser compatibility and mobile responsiveness.*
- *Incorporated modern CSS techniques, such as flexbox and grid, to create a visually appealing and user-friendly layout.*
- *Integrated interactive elements using JavaScript, including a typing animation effect, to add a personalized touch to the user interface.*
- *Deployed the portfolio on GitHub pages, ensuring easy access and continuous availability.*

EXPERIENCES

TAX ASSOCIATE — Aug 2020 - Nov 2021
Grant Thornton LLP — *Milwaukee, WI*

- *Responded to inquiries from the IRS and other taxing authorities.*
- *Conducted in-depth analysis of more than 10 tax-related regulations affecting the organization.*
