Marquette University — *Milwaukee, WI*
College of Business Dean's List
Ignatius and Magis Scholarship
Member of Beta Gamma Sigma Business Honors Society
GPA: 3.58/4.00

PROJECTS

E- Connect Platform for Anton Technology LLC (Backend Developer) — 2024

Anton Technology is a small consulting firm who helps Chinese suppliers explore the US market, find the suitable original equipment manufacturer (OEM), and build strong business relationships. This application created a comprehensive B2B platform for Anton Technology LLC, designed to facilitate interactions between Chinese suppliers and U.S. OEMs.

- *Engineered a robust product database encompassing over 100 products from various suppliers, enabling OEMs to search by industry and request detailed information with a single click.*
- *Implemented a consulting service request system, streamlining communication between interested OEMs and Anton Technology. Utilized AWS Simple Email Service (SES) to notify intermediaries, improving the consulting process by 50%.*
- *Developed a project coordination module that empowered Anton Technology to initiate and manage projects between suppliers and OEMs, enhancing the efficiency of cross-border business collaborations.*
- *Designed an advanced search engine for supplier and OEM selection, allowing users to search products by multiple criteria, reducing the average time to find suitable suppliers by 30 seconds per search, leading to faster procurement cycles.*
- *Designed Java DTO (Data Transfer Object) mechanism to control the information returned, preventing users from accessing sensitive data such as pricing, thereby avoiding competition issues.*
- *Utilized JSON Web Tokens (JWT) for secure authorization and authentication, ensuring that only verified users could access sensitive features and data, thereby enhancing the platform's security.*
- *Automated the CI/CD pipeline using AWS CloudFormation, enabling seamless deployment by automatically testing and deploying any changes made in GitHub, improving deployment efficiency by 80% and significantly reducing the time from development to production.*

EXPERIENCES

TAX ASSOCIATE — Aug 2020 - Nov 2021
Grant Thornton LLP — *Milwaukee, WI*

- *Worked with overseas team members to review data input and resolve technical tax issues.*
- *Responded to inquiries from the IRS and other taxing authorities.*
